

OxiLeach™ Packaged Leaching Plants

The OxiLeach™ plant successfully provides oxidative leaching at a fraction of the cost of alternatives. It gives you flexibility in both feed sources and production rate. This means it'll suit any site requirements. Our latest installation sees it producing copper sulfate reagent from copper cementation cake at a zinc flotation plant – and at a fraction of the cost of purchasing copper crystal.

<p>RECYCLING BATTERIES OR METAL WASTE or producing reagent</p>	<p>SUITABLE FOR BOTH ACID AND ALKALINE CONDITIONS</p>	<p>HYPERSPARGE™ SUPERSONIC GAS INJECTION for max oxygen transfer</p>
<p>ONLINE ANALYSER OPTION for metallurgical accounting</p>	<p>PROVEN AND OPERATING IN THE REAL WORLD</p>	<p>CUSTOMISABLE FINAL PRODUCT including solution, crystal, centrifuge, filter, etc.</p>
<p>COMPACT AND FULLY BUNDED for reduced footprint and environmental impact</p>	<p>WIDE RANGE OF RESIDENCE TIME AND THROUGHPUT OPTIONS</p>	<p>SCRUBBER CLEANS ALL OFF-GAS</p>
